

I studied Nutrition and Health - with a specialisation in epidemiology - at Wageningen University (1992-1997). In the period 1998-2006 I worked in various positions at two municipal health services and a market research agency. Since 2006 I have been working at the Centre for Infectious Disease Control at RIVM as an epidemiologist in the field of the National Immunisation Programme on various topics (vaccination coverage, varicella zoster virus, burden of disease expressed in DALYs). In 2019 I obtained my PhD on the subject: "Epidemiology of varicella zoster virus in the Netherlands: implications for vaccination strategies" (<https://dspace.library.uu.nl/handle/1874/384866>).
