

**George Sourvinos** is a full Professor of Clinical Virology at the Medical School of Crete and Director of the Laboratory of Clinical Virology of the University Hospital of Crete. His research is focused on the application of advanced molecular diagnostic tests, aiming to integrate new technologies into clinical care whenever relevant to patient or public health. Furthermore, he is interested in the VZV/HSV/CMV-host interactions in the context of viral lytic and latent infections, studying *in vivo* models and human tissue specimens and their potential as molecular biomarkers. He has published more than 120 peer reviewed articles (h-index 29, ISI). Prof Sourvinos has served as a Council Member of the *European Society for Clinical Virology* since 2006 while, among other journals, he is an Associate Editor of *Journal of Clinical Virology*.
